EMPOWERING INNOVATION

DISCLAIMER

This report is provided for informational purposes only and is intended solely for the person to whom it is delivered. This report is confidential and may not be reproduced in its entirety or in part, or redistributed to any party in any form, without the prior written consent of Marto Capital LP ("Marto Capital"). This report was prepared in good faith by Marto Capital for your specific use and contains certain information concerning Marto Capital and Marto Capital Master Fund LP (the "Fund"). Information contained in this report is current only as of the date specified in the report, regardless of the time of delivery or of any investment, and does not purport to present a complete picture of Marto Capital, the Fund or any other fund or account managed by Marto Capital, nor does Marto Capital undertake any duty to update the information set forth herein.

This report does not constitute an offer to sell or the solicitation of an offer to purchase any securities, including any securities of Marto Capital, the Fund or any other fund or account managed by Marto Capital. Any such offer or solicitation may be made only by means of the delivery of a confidential private offering memorandum (each, a "Memorandum"), which will contain material information not included herein regarding, among other things, information with respect to risks and potential conflicts of interest. The information in this report is qualified in its entirety and limited by reference to such Memorandum, and in the event of any inconsistency between this report and such Memorandum, the Memorandum shall control. In making an investment decision, you must rely on your own examination of the Fund and the terms of any offering. You should not construe the contents of this report as legal, tax, investment or other advice, or a recommendation to purchase or sell any particular security.

The performance returns presented herein are a composite of the following: (i) from July 2015 through October 2016, the actual performance of a proprietary account of Marto Capital Demo Fund LP (the "Account") in which approximately \$2 million was invested using an investment strategy substantially similar to that employed by the Fund; and (ii) the actual performance of the Fund from its launch in November 2016 through the date listed herein. The performance returns (a) from July 2015 through October 2016 do not reflect the deduction of any fees or expenses, which, if deducted, would materially lower performance; (b) from November 2016 through December 2016 are calculated net of all management fees, but gross of all other fees and Fund or account expenses, as the Manager had agreed to temporarily pay all Fund and account expenses for the months of November and December 2016, which, if deducted, would materially lower performance; and (c) from January 2017 through April 2017 are calculated net of all management fees, all other fees and Fund and account expenses; and (d) beginning May 2017 are calculated net of all management fees, but gross of all other fees and Fund or account expenses, as the Manager had agreed to temporarily pay some or all Fund and account expenses going forward, which if deducted, would materially lower performance. All performance returns reflect the reinvestment of dividends.

The performance returns presented herein are not the returns of any investor in the Fund. An individual investor's actual return will vary from the performance results presented herein based upon, among other factors, the class of interest in which it invests, the timing of investments and redemptions, differing fees and expenses, and an investor's eligibility to participate in, or exclusion from, certain investments. Results may not have been audited or realized, and should not be relied upon as such. It should not be assumed that the investment decisions that Marto Capital makes in the future will be profitable or will equal the historical performance of the Fund or the Account. Past performance is not indicative of, and not a guarantee of, future results. The valuations of unrealized investments are determined on a fair value basis in accordance with Marto Capital's valuation policy, but there can be no assurance that unrealized investments will be realized at the valuations used to calculate the performance estimates set forth above. Actual realized returns may vary depending on, among other factors, future operating results, the value of assets and market conditions at the time of disposition, transaction costs, and timing and manner of sale, all of which may differ from the assumptions on which the valuations used to calculate the performance returns set forth herein.

Notwithstanding the information presented in this report, investors should understand that Marto Capital is not limited with respect to the types of investment strategies it may employ or the markets or instruments in which it may invest, subject to the terms of the offering and governance presentations of any of the Fund. Over time, markets change and Marto Capital seeks to capitalize on attractive opportunities wherever they might exist. Depending on conditions and trends in the capital markets and the economy, Marto Capital may pursue objectives or employ techniques it considers appropriate and in the best interest of the Fund, which may differ from the objectives, techniques or investments presented in this report. No assurance can be given that investment objectives or targeted/projected returns will be achieved.

The returns of several market indices are provided in this report for comparison purposes only and the comparison does not mean that there necessarily will be a correlation between the returns of the Fund, on the one hand, and any of these indices, on the other hand. The indices have not been selected to represent an appropriate benchmark against which to compare the Fund's performance; but, rather, are disclosed to allow for comparison of the Fund's performance to that of certain well-known and widely recognized indices. The returns of the Fund differ from these various indices in that, among other reasons, the Fund is actively managed and may use leverage. Such indices are unmanaged and are not subject to fees and expenses, including transaction costs, typically associated with private investment funds. In addition, the Fund's holdings may differ from the securities that comprise the indices and the differences may be material. Investments cannot be made directly in indices and such indices may re-invest dividends and income.

The information included in this report is based upon information reasonably available to Marto Capital as of the date noted herein. Furthermore, the information included in this report has been obtained from sources Marto Capital believes to be reliable; however, these sources cannot be guaranteed as to their accuracy or completeness. No representation, warranty or undertaking, express or implied, is given as to the accuracy or completeness of the information contained herein and no liability is accepted for the accuracy or completeness of any such information.

This report may contain certain "forward-looking statements," which may be identified by the use of such words as "believe," "expect," "anticipate," "should," "planned," "estimated," "potential," "outlook," "forecast," "plan" and other similar terms. All such forward-looking statements are conditional and are subject to various factors, including, without limitation, general and local economic conditions, changing levels of competition within certain industries and markets, changes in interest rates and availability of leverage, changes in legislation or regulation, and other economic, competitive, governmental, regulatory and technological factors, any or all of which could cause actual results to differ materially from projected results.

HUMANITY CENTRIC FUND
EMPOWERING INNOVATION
